PROFESSIONAL SUMMARY

Results-driven Front-End Developer with 2+ years of experience building production-ready web applications. Proficient in JavaScript, TypeScript, React.js, and Next.js, with a strong track record of delivering high-performance, accessible, and scalable UI systems. Currently expanding into full-stack development with Node.js and Supabase, while actively shipping AI-powered SaaS products and systems-level tools as an indie developer. Passionate about combining technical depth, creative problem-solving, and emerging AI tooling to build impactful products one release at a time.

PROFESSIONAL EXPERIENCE

Front-End Developer | Nexapay

Nov 2025 – Present

Ondo, Nigeria • Remote

- Developed and maintained responsive user interfaces using React.js, TypeScript, HTML5, and CSS3, directly contributing to product features used by live customers.
 - Architected and shipped reusable, accessible UI component libraries aligned with design system specifications, reducing future development time by an estimated 30%.
 - Integrated RESTful APIs to enable dynamic data rendering, real-time state updates, and seamless backend-to-frontend interactions.
 - Identified and resolved critical front-end performance bottlenecks, improving page load times and application stability across key user flows.
 - Collaborated cross-functionally with designers, backend engineers, and product stakeholders in an Agile environment to deliver features on schedule.
-

FEATURED PROJECTS

onePost — AI Content Repurposing SaaS | Next.js 15, TypeScript, Claude API, Supabase, Paystack, Tailwind CSS

- Designed and built a full-stack SaaS platform from zero to deployed product, enabling content creators to transform long-form content into platform-optimized posts for LinkedIn, Twitter/X, Instagram, TikTok, newsletters, and SEO — in under 10 seconds.
- Engineered an AI repurposing engine using the Anthropic Claude API, writing platform-specific prompt strategies that produce context-aware, tone-matched output per social platform.
- Built a Custom Tone Profiles system where Pro users define their personal brand voice — the AI studies their writing style and matches it across all outputs, significantly improving content authenticity.
- Implemented a complete SaaS monetization stack with Paystack: subscription plans, HMAC-verified webhook-driven plan enforcement, credit-based usage limits per tier, and automated billing lifecycle management.
- Integrated YouTube transcript extraction and blog URL content scraping to support diverse input sources beyond plain text paste.
- Deployed to Vercel with Supabase (PostgreSQL + Auth + RLS) as the data layer, achieving sub-200ms API response times in production.

oneSound — Phone-as-Speaker Audio Streaming | Python, asyncio/aiohttp, WebSockets, Web Audio API, PyInstaller

- Built a Windows desktop application that captures live system audio via WASAPI loopback and streams it in real time to any phone's web browser over WiFi — turning a phone into a wireless PC speaker with zero app installs, cloud services, or cables.
- Engineered a custom AudioWorklet-based jitter buffer running on a dedicated audio rendering thread to absorb network latency and prevent playback drift, achieving smooth ~100ms-latency streaming audio.
- Implemented runtime self-signed TLS certificate generation for secure HTTPS/WSS streaming, plus mDNS (Zeroconf) and QR-code-based discovery for zero-configuration phone pairing.

- Packaged the application as a standalone Windows executable with PyInstaller, resolving native dependency bundling issues across async and audio libraries for clean-machine distribution.

RoboLearn — AI-Powered Robotics Learning Platform | *Next.js 15, TypeScript, Claude API, Supabase, MDX, Tailwind CSS*

- Built a full-stack robotics education platform with structured learning tracks across Software (Python, ROS 2, simulation), Mechanical (CAD, joints, mechanisms), and Electrical (circuits, microcontrollers, sensors) engineering.
- Integrated an AI tutor powered by the Claude API that answers student questions in the exact context of the active lesson content.
- Implemented quiz generation with progress tracking, a community hub, and a leaderboard, with lesson content authored and rendered via MDX.

Trading Journal & Strategy Marketplace | *Next.js, Supabase, Paystack, Tailwind CSS*

- Engineered a full-stack FinTech marketplace enabling traders to list, sell, and independently track performance metrics for algorithmic and manual trading strategies.
- Integrated Paystack with HMAC-verified webhooks to automate order fulfillment and enforce revenue-splitting logic, and built a Digital Asset Gating system using Supabase Private Storage and time-limited Signed URLs for paid content.
- Built dynamic performance dashboards calculating real-time PnL, Win Rate, and Expectancy by aggregating trade data through optimized PostgreSQL relational queries.

CaptionGrab — YouTube Caption Extractor | *Next.js 15, TypeScript, YouTube API, Tailwind CSS*

- Built a free, sign-up-free tool that extracts YouTube video subtitles in 23 languages and exports them as .SRT, .VTT, or .TXT, compatible with Adobe Premiere, DaVinci Resolve, and Final Cut Pro.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Python

Frameworks & Libraries: React.js, Next.js 15 (App Router), Tailwind CSS, Framer Motion, Node.js, MDX

Backend & Database: Supabase (PostgreSQL, Auth, RLS, Storage), REST APIs, WebSockets, asyncio/aiohttp

AI & APIs: Anthropic Claude API, Groq API (Llama 3.3), prompt engineering, AI-powered product development

Payments: Paystack (webhooks, HMAC verification), Stripe (subscriptions, webhooks, billing portal)

Systems & Dev Tools: Git/GitHub, Vercel, VS Code, PyInstaller (native app packaging), Trello, Component-driven architecture

Other: Performance optimization, responsive UI design, web accessibility (WCAG), SaaS product development, real-time systems

EDUCATION

Bachelor of Science, Computer Science — 2025

Landmark University, Omu-Aran, Nigeria

CERTIFICATIONS

Google Data Analytics Professional Certificate — Udemy — 2025

Python Programming Certification — Udemy — 2025

Data Science Certification — Udemy — 2024

Certification Mastery in Excel — Udemy — 2024
